parental responsibility, social works, empowering women and most importantly multi-stake holder activity. For the past 20 years, she is involved in research activities in the field of Internet Networking. Dr. Sudha has authored books entitled "Integrating SOA and Web Services" and "Combating Cyber Threat through Cyber Security Intelligence". She has also authored many chapters in premier publications and is an active reviewer for a number of peer reviewed journals.

Dr.N.Sudha Bhuvaneswari is an active contributor to policy and technical discussions in the Asia Pacific Region. She is a member of the Internet Society since 2007 and actively participated at APNIC, APRICOT, IGF, APrIGF, and inSIG. Besides, she is a member of the APrIGF Multistakeholder Group and served on the Program as well as Fellowship Committees of APNIC, APrIGF, and inSIG. She also actively participates at Women in ICT forums and Cyber Security and contributes towards BPF on Cyber Security at IGF since 2017.

Dr. Sudha is intimately familiar with the RIR system, as well as the ICANN organization and eager to contribute her time to community-driven, consensus-based decision-making process.

"Women are not problem.

They're the solution and the largest untapped reservoir of talent in the world.

Women are the real architects of society

If you want something said, ask a man,

If you want something done, ask a woman"
