ABSTRACT

Application security assessment is the process of evaluating the security of an application or system by identifying potential vulnerabilities and threats. It involves testing an application or system to determine its security posture and to identify any weaknesses that could be exploited by attackers. There are several different types of application security assessments, including penetration testing, vulnerability scanning, code review, and threat modeling. Each type of assessment provides a different perspective on the security of the application or system, and all of them can be useful in identifying and mitigating security risks. Overall, application security assessment is an important process for any organization that wants to ensure the security of its applications and systems.

SPEAKER'S BIO

Dr. Akashdeep Bhardwaj is working as Professor (Cyber Security & Digital Forensics) at University of Petroleum & Energy Studies (UPES), Dehradun, India. An eminent IT Industry expert with over 27 years of experience in areas such as Cybersecurity, Digital Forensics and IT Management Operations. He now mentors graduate, masters and doctoral students and leads several IT Security projects. ABOUT APNG

Asia Pacific Next Generation (APNG) <<https://apng.asia/>> is a non-profit organization dedicated to the advancement of internetworking infrastructure in the Asia Pacific region and to the research and development of all associated enabling technologies. Its key mission, among others is to contribute Digital Growth in the Asia Pacific (AP) region. APNG empowers the Next Generation in Asia Pacific by organising annual APNG Camps, sharing information amongst the community, understanding the digital divide in each AP country to overcome them, advancing digital transformations, contributing at regional forums, creating new opportunities for its members, and organising webinars on emerging topics in technology.

ABOUT APNG WEBINARS

APNG (Asia Pacific Next Generation) <<https://apng.asia/>> is an arena in which future leaders of the digital society in the Asia Pacific region gather to build a human network and learn from each other. Asia Pacific Next Generation has offered resources and discussions for multi-stakeholders from different regions to challenge the digital divide. We had a successful year of 2020 and 2021 webinars, where our esteemed and expert speakers spoke on a range of topics on emerging technologies from Research and Practice on Blockchains to Artificial Intelligence. APNG organises webinars on the third Saturdays of the even months (February, April, June, August, October, and December) of the calendar year. The 1 hour webinar starts at 12:00PM UTC +9.
